

# Citadel / Maclab Theatre - Edmonton Alberta

The Maclab Theatre is located in the Lee Pavilion, at the base of a spectacular indoor waterfall. The Theatre has a thrust stage, with 12 rows of seats set in a "U" around the stage. Because of the intimate layout, many people are surprised the Maclab holds The Citadel's largest audience, accommodating 682 people. Perfect for any event where the audience and on-stage personnel interact.

Allstar supplied and installed a new Strand Lighting Dimming and Network system. The system consists of four 48 modular dimmer racks loaded with one hundred seventy-eight 20A Dual SSR Dimmer modules, six 20A Dual Relay Modules, four 50A Single SSR Dimmer Modules and four 50A Single Relay modules.
